INTRODUCTION

The DeFi market was designed to get rid of excessive extortion from centralized finance. When we consider how the Binance Smart Chain seems to use centralized authority to offer “benefits” over their decentralized partnerships, we can catch a glimpse of how cryptocurrency redefines how wealth can be acquired. We missed the old DeFi days whereby there are no highly ridiculous taxes, scam Devs and Influencers filling up their bags to dump on investors.

Shinki Inu is an experimental token aiming to be the strongest meme token ever developed. Our founder, Linguini considered the community first and decided to fund the project with 100% transparency and security.

Shinki Inu considered the community and investors as the foundation of every successful project – Shinki is designed to be 100% fair and transparent, controlled by the community, with a 5% tax on buying and selling, proper utility and an achievable road-map. No presale or private deal, LP tokens locked for 1 year, and smart-contract audited then, ownership renounced.

About Team

We are a group of a fresh, and experienced team of Devs, Designers, Moderators Marketers, Shillers and crypto Inu lovers. We are passionate about creating a long-term, relevant and top-notch project that will make investors rich. The team are based in Europe and America.

Our Mission

Our mission is straightforward. Linguini, love for community prompted him to fund the project without any benefit. The success of the project is the 1st protocol of the team. Shinki at over \$100 million MC is very much realistic with the aid of the community (SHINKARMY).

We are not just building a project with high market capitalization, but we are planning to achieve high market capitalization with one of the strongest communities out there.

Network: BSC

Total Supply:

1,000,000,000,000 SHINK

Tokenomics

Autoliq: 3%

It helps to improve the pool over time and is highly tradeable with good volume in the long term run.

Development: 2%

The fee will help to acquire funds for long term vision, expansion and other chain development.

Road map

Phase one

- SHINKI INU Development
- LP Lock and ownership renounce
- Social Media
- Smart Contract Audit
- Inu Paper
- Website
- Shinki swap
- Phase one Marketing

Phase two

- 2,000 Telegram members
- Portfolio Tracker
- 500+ holders
- CMC and CG Application
- NYC Times Square Billboard
- Phase two Marketing
- Social media expansion
- Crosschain Bridge Development

Phase three

- NFT Reviews
- Big influencers onboard
- Phase three marketing
- Crosschain Bridge Launch
- NFT Launch
- Team Expansion
- SHINKIDEX

Phase four

- CEX Listing
